This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

**Recommendations (optional):** In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

1. Implement least privilege and separation of duties policies to reduce insider threats and limit exposure of sensitive data.
2. Establish a formal disaster recovery plan to ensure business continuity during outages, disasters, or cyber incidents.
3. Deploy an Intrusion Detection System (IDS) and consider a hybrid IDS/IPS for improved monitoring and proactive threat response.
4. Adopt a centralized password management system with MFA capabilities to secure credentials across endpoints and services.
5. Encrypt customer data at rest and in transit, especially credit card and personally identifiable information (PII).

6. Strengthen GDPR and PCI DSS compliance by classifying customer data, implementing breach response protocols, and securing the entire payment processing pipeline.
7. Install CCTV cameras in key areas to detect and investigate physical access breaches and unauthorized presence.
